

SOLARES-AD-1

## Do you have moderate to severe atopic dermatitis?

*Learn about the SOLARES-AD-1 clinical research study*

The treatment of moderate to severe chronic atopic dermatitis remains challenging. SOLARES-AD-1 is a clinical research study that is exploring an investigational treatment to see how well it may work in treating atopic dermatitis.

You may be eligible if you:

- Are  $\geq$  18 years old
- Have a diagnosis of atopic dermatitis for  $\geq$  1 year
- Are willing and able to understand and comply with the requirements of the study, including attendance at the required study visits
- Are not pregnant, breastfeeding, or planning to become pregnant or get your partner pregnant

There are other requirements to join this study. To learn whether the study may be right for you, please contact us:
